Standalone Printing

Printing Label anytime and anywhere

- No need to connect computer for label printing
- LCD screen supports multiple language interfaces
- Free bundled "WinLabel" label design program for creating standalone file
- Editable field on the label can do arithmetic and string handling
- Built-in Real-time clock for date coded labelling
- Print on demand anytime when required
- SD card can easily store thousands of standalone files
- The diversity of external device connection (keyborad, scanner, and scale...etc)

Standalone Printing is suitable for various industry applications

Product Validation

Logistic Management

Library Management

Chinese Herbal Medicine Shop

General Merchandise Retailer

Flow-line Production

Medical Management

On-sale Label

Cooked Food Area

Food Ingredient Labelling

Baking Industry

Fruit Stand

Standalone operation schematic diagram

- ◆ Free bundled labeling software "WinLabel" for making standalone program file
- ◆ Provide a string combination from the multiple source information (ex. serial number plus data plus external input weight...etc)
- ◆ Provide a variety of dynamic data processing for each variable field (ex. discard texts from left, keep numbers only, to upper case...etc)
- ◆ Provide a variety of external device input for each variable field (ex. scale, RS232 interface, date, keyboard, scanner...etc)
- ◆ External input data can execute arithmetic directly (+-x÷%, rounding off, kilogram into pound...etc)
- ◆ Store thousands of standalone programs in different multiple language file names in the printer
- ◆ Standalone program file can be easily done by setting parameters on the WinLabel No need to write computer codes to create file anymore
